Clearance Level: 5+

Subject: The Meating

Classification: ACTIVE THREAT / IDENTITY COMPROMISE

Recent surveillance within multiple map instances — primarily, *gm_multibuild*, and *gm_genesis* — has identified a growing organized presence referred to as “**The Meating.**” Initial discovery followed a string of player-reported “duplicate sightings” of [REDACTED], the current [REDACTED].

Interviews with witnesses describe these duplicates as “*slightly wrong*” — exhibiting distorted audio, desynced movements, or unnatural model clipping when approached.

Members of The Meating are **not Hostile** on initial contact, often attempt to integrate seamlessly into public areas, mimicking speech patterns and server behavior of regular users.

IDENTITY CONTAMINATION RISK

Z.I.D. analysis indicates a **high probability** that members of The Meating are controlled extensions of [REDACTED] — the shapeshifting organism previously encountered in *gm_windswept*.

However, unlike direct manifestations, Meating entities display *coordinated behavior*, suggesting hive-mind communication or shared processing through server infrastructure.

It is theorized that the cult does not worship the entity — it *is* the entity, distributed across player slots.

CURRENT STATUS

- At least **6 confirmed Meating infiltrations** detected within player rosters in the past 48 hours.
- **3 incidents** of full mimicry of known community members, including multiple Mikes.
- Attempts to ban or kick affected players result in immediate replication elsewhere.

Containment priority has been upgraded to **Code Z-5: Network-Level Anomaly**. All Zoltins News transmissions are now being monitored for mimicry signs.

NOTES

“If you meet Mike Zoltins — ask him what day it is.
The real one doesn’t remember anymore.”
— Agent S. [REDACTED], Z.I.D.

FILE STATUS:

OPEN / CRITICAL

All operatives are to assume potential identity compromise.

Avoid unsupervised communication with entities claiming affiliation with *Zoltins News*.
