Status: ACTIVE / HOSTILE

SUMMARY

Over the past 14 days, multiple reports of hostile shapeshifting activity have been confirmed across multiple maps, including *gm_windswept*, *gm_multibuild*, and *gm_genesis*. The entity cluster, now officially designated “**The Meating**”, demonstrates aggressive mimicry of high-profile players, primarily targeting [REDACTED].

The Meating engages in violent behaviors, including:

- Attacking players on sight.
- Replicating models and avatars with minor distortions.
- Disrupting server operations, including physics and NPC spawning.

BEHAVIORAL OBSERVATIONS

- **Imitation:** The Meating can perfectly mimic speech and movement of the targeted individual, but glitches appear when closely observed (distorted hands, static eye textures, erratic idle animations).
- **Aggression:** Unlike prior shapeshifting anomalies, the Meating actively hunts players instead of hiding.
- **Propagation:** Unconfirmed reports indicate the entity can reproduce through infected avatars or by directly replacing existing server accounts.

CONTAINMENT PROTOCOLS

1. Avoid direct engagement with known Meating duplicates.
2. All news broadcasts and public feeds must be monitored for anomalies.
3. Server administrators must report unusual behavior immediately to A.C.E. central.
4. Do not attempt to ban or kick duplicates — entities reappear under new accounts.
5. Maintain a minimum distance of **10 meters** from any suspected Meating presence.

FIELD NOTES

“The Meating isn’t just imitating — it’s rewriting the rules.
Every copy is aggressive. Every duplicate is dangerous.
This isn’t a prank. Avoid it at all costs.”
— Agent K. [REDACTED], A.C.E.
